BACKEND / .NET DEVELOPER

Backend-focused C#/.NET developer experienced in modernizing business-critical APIs, SQL Server integrations, and full-stack applications using React and TypeScript.

PROFESSIONAL EXPERIENCE

Programmer (Backend / .NET Developer)

JUN 2026 – DEC 2026

Tokio Marine Life Insurance (Thailand) PCL. (Contract)

Project: Fast Track Revamp

- Contributed to modernizing legacy insurance backend APIs and application workflows using C# and .NET 8.
- Developed submission and client-processing components, including data mapping, business rules, and juvenile applicant and payer validation.
- Integrated SQL Server stored procedures and verified controlled database writes, readbacks, and data consistency during UAT.
- Added diagnostic logging, regression checks, and technical documentation to support troubleshooting and release-readiness reviews.

Full-Stack Developer (Contract)

MAR 2026 – APR 2026

Cloud Fission Co., Ltd. | On-site at Government Pension Fund (GPF)

- Maintained GPF applications, diagnosed bugs and configurations, and supported environment setup and static asset/CDN adjustments.
- Assisted with unit testing and Jenkins CI/CD using C#, .NET Core and MS SQL Server.

Software Developer (Junior)

JUL 2022 – DEC 2025

Thai Roong Ruang Technologies Co., Ltd.

- Built internal applications and REST APIs using C#/.NET, React/TypeScript and SQL Server.
- Optimized SQL queries, Stored Procedures and validation logic for data-intensive workflows.
- Collaborated through Git, Azure DevOps and deployment pipelines.

EDUCATION

Rajamangala University of Technology Phra Nakhon

B.B.A. — Information Technology & Software Development | 2020
